Chemicals for industrial water/waste water treatment

As a producer and formulator, we offer not only chemical products, but also an impressive all-round package with well-conceived procedures.

Our customer service laboratory is used to carry out test series and ongoing developments. Our specialists will support you with the introduction of new products and provide after sales service.

Take advantage of our know-how and practical experience.

Heavy metal precipitating agents

- *HydroMet Alpha: unique and unrivalled*
- *Diplexin AM series: modified organosulphides for heavily complexed waste water*
- *Diplexin P series: inexpensive and efficient organosulphides*
- *Diplexin MR series: sulphide-free metal precipitation*

Separation and flocculating agents

- in powder form, low-dust*
- *ZetaPol 88 series: in a class of their own*
- *ZetaPol HC series: the bargain buy*
- *ZetaPol 11 series: all-purpose*

Coagulants

- *Koagulin A series: for the maximum possible pollution load*
- *Koagulin FS series: efficient and cost-effective*
- *Koagulin FCT-/PK series: for emulsions and oily waste water*
- *EVO-Flock: the new formula*

Speciality products

- *All-purpose defoamer*
- *Sorbadur: scale inhibitor for water systems*
- *Reductor series: for the reduction of cyanide, sulphate, nitrite and oxidising agents*
- *Sorbacid: prevents bacterial, algal and fungal infestation*
